# When was the last time you had your home’s cooling system tuned up?

If it has been of few years, now is the time to have your heating and cooling contractor - inspect, service, and clean it. Typically tune-ups on cooling systems that have been neglected for a few years can provide 5-15% energy savings, or more. Not to mention the unit can better perform from a comfort and equipment longevity stand point.

Fortunately there is a \$30 EnergyWise<sup>SM</sup> incentive available to homeowners that have their cooling system tuned-up, regardless of what type or age of cooling system it is (air conditioner, air or water source heat pump).

The application includes a checklist of key components your contractor should inspect as well as items for discussion, such as; filter replacement schedule, proper temperature set-back practices and an understanding of the general condition of the system.

## \$30 incentive qualifications

- Incentives are available to customers who have their cooling system inspected and tuned-up by an HVAC contractor.
- Qualifying systems include residential central - air conditioners, air source and water source heat pumps that are served by Nebraska Public Power District or its Wholesale Utility Partners.
- Even though the cooling system may be serviced or tuned-up frequently, the customer is only eligible for the EnergyWise<sup>SM</sup> \$30 incentive a minimum of every three years.

Incentives valid as of 1-1-2012. Subject to change without notice. Verify current incentive amounts and program information at [www.nppd.com](http://www.nppd.com). These EnergyWise<sup>SM</sup> programs are only available to customers of NPPD and customers of its wholesale utilities.
